

**INDEPENDENT QUALIFICATION
OF HYDROGEN PROCESSING
EQUIPMENT**

COMPANY OVERVIEW

Mission

HyET HyLabNL's mission is to accelerate market adoption of novel hydrogen process equipment.

Value proposition

HyET HyLabNL is an independent test facility in which hydrogen process equipment can be validated and qualified by imitating in-field testing conditions of customer use-cases.

Key capabilities

- **Demonstration of components and systems for various use cases**
- **Performance validation and qualification according to client requirements**
- **Proof compliance with industry norms and regulations (e.g. ISO, CE, KHK)**
- **Testing of operational performance parameters:**
 - Energy efficiency
 - Unmanned and endured operation under dynamic conditions
 - Availability and maintainability
 - Hydrogen recovery / purity
- **Training of personnel in the hydrogen field**

Examples of markets served

Hydrogen generation
(Power-to-Gas)

Fuel cells

Hydrogen storage and transportation

Piping and instrumentation

High-pressure refueling
