

COST-EFFECTIVE ELECTROCHEMICAL HYDROGEN PROCESSING

COMPANY OVERVIEW

Mission

HyET Hydrogen strives to provide affordable hydrogen to end-users by replacing traditional compression, purification and separation technology with Electrochemical Hydrogen Processing (EHP) equipment.

Value proposition

Electrochemical Hydrogen Processing equipment provides the lowest Total Cost of Ownership for compression, purification and extraction of hydrogen.

Unique benefits of EHP

- High uptime - 99% availability
- Flexible, 10% to 200%
- Sub-atmospheric inlet conditions possible
- High compression ratio (up to 2000 single-stage)
- No moving parts - silent operation

Examples of markets served

Hydrogen release plants

High-pressure refueling

Green power buffering

H₂/NG separation

Transportation and storage

Building heat and power
