

## RAPID PROTOTYPING AND ROLL-TO-ROLL MANUFACTURING OF MEMBRANE ELECTRODE ASSEMBLIES

# COMPANY OVERVIEW

## **Mission**

HyET Pro<sup>2</sup>NL's mission is to accelerate the development and production of essential decarbonization technologies.

## **Value proposition**

HyET Pro<sup>2</sup>NL's capabilities for rapid prototyping and Roll-to-Roll manufacturing of MEAs heavily reduce both the costs and lead times of critical components in decarbonization technologies.

## **Key capabilities**

- **Rapid prototyping**  
*Reduces the lead time for manufacturing of critical components from weeks to minutes*
- **Roll-to-Roll manufacturing of MEAs**  
*Increases the quality of components while reducing costs and lead times*
- **System engineering**  
*Key capabilities on designing system infrastructures and Balance of Plant for the integration of novel technologies*

## **Examples of markets served**

Electrolyzers

Fuel cells

Electrochemical hydrogen compressors and separators

Flow batteries

Lithium ion batteries
