

LOW-COST GREEN ELECTRONS FROM LIGHTWEIGHT & FLEXIBLE PV MODULES

COMPANY OVERVIEW

Mission

HyET Solar's mission is to provide the market with cost-effective Powerfoil modules that generate low-cost electricity and have unique application possibilities.

Value proposition

HyET Solar's Powerfoil, a flexible thin-film solar product, maximizes the solar potential of both industrial-scale and niche market surfaces to yield to lowest cost of electricity.

Unique benefits

- Low module cost (<\$ 0.10/Wp at scale)
- Very low system costs
(BoS costs: 30-70% of conventional PV)
- Very high power density (Wp/m²)
- Unique application possibilities
(due to low weight and flexibility)
- Resistant to high temperatures and UV
- ATEX zone I certified
- Easily recyclable

Examples of markets served

**Industrial-scale
PV plants**

**High-end architectural
applications**

Distributioncenters

Airport terminals

Storage tanks

Shopping malls

Football stadiums

**Refueling
stations**
